Getting your voice heard in  
**South East Cambridgeshire**

## MORE FUNDING FOR OUR SCHOOLS

■ Since being elected as your MP we have secured **£3.1 million extra funding** for South East Cambridgeshire schools following rigorous campaigning.

In addition, we gained 'opportunity area' status for East Cambridgeshire benefitting from **£6 million more** as a result.

This means that schools are now able to call on more training for **mental health support, early years improvement and assistance to acquire the best teachers.**

Recently the Prime Minister announced a further package of **£14 billion** for schools.

I will continue to represent the schools in our area and further improve the standards for our children to ensure that they get the start in life that they deserve.

## WORKING TO HONOUR THE RESULT OF THE EU REFERENDUM

■ Of course, Brexit continues to dominate our national debate. This leaflet sets out what I have been working on locally, for you, since I was first elected. In parliament I have consistently voted to honour the result of the referendum and to do so in an orderly manner providing certainty for our future and securing the best possible trading relationship with the EU going forward.

Standing up for you in Parliament

## IMPROVING TRANSPORT LINKS

■ With financial support from national and local government we built the Ely bypass, easing congestion through the city and improving journeys for everyone in the constituency.

Since being elected, I have spearheaded a campaign to get the A10 upgraded. Over a thousand residents have signed my petition

much needed safety and capacity improvements to the A1307 where work has now begun - with a £14million package to improve road safety, bus priority and to upgrade walking and cycling routes along the road by the end of 2020. I am also campaigning to secure investment in junctions 37 and 38 on the A14.

in support of upgrading the road. The Combined Authority and Mayor have put in a bid for government funding. I am supporting the upgrade and the bid so that commuters don't have to sit in traffic on their way to work every day. I have been working with both the Greater Cambridge Partnership and the Mayor to press for

Getting your voice heard in  
**South East Cambridgeshire**

*Dear Resident,*

It has been a great privilege to serve as the MP for South East Cambridgeshire.

My record is one of delivery both in the South East Cambridgeshire and Westminster.

My current campaigns and priorities include:

- Fighting for even more school funding in our area – **secured £3.1 million for our schools to date**
- Achieving broadband connectivity for all South East Cambridgeshire – **we now have 97% superfast broadband coverage across Cambridgeshire**
- Continuing to support local business and farming communities – **raised issues with Ministers such as investment in science and technology and the need for skilled and agricultural workers**
- Standing up for our local healthcare – **increasing investment in Addenbrooke's and saved the Princess of Wales minor injuries unit**
- Securing key investment for our local infrastructure – **including the Ely Bypass, spearheaded the A10 upgrade campaign, lobbying for more infrastructure into Cambridge**
- Working to **honour the result of the referendum** - leaving in an orderly manner and securing the best possible trading relationship going forward.

I will continue working to get your voice heard on these and many other issues.

Kind regards

*Lucy*

# A LOCAL CHAMPION

*Working Hard for Local Residents*

For four years as your MP I have worked with local campaigners and local councillors; I have lobbied Ministers and raised your issues in Parliament – getting our local voice heard and getting things done here in South East Cambridgeshire.

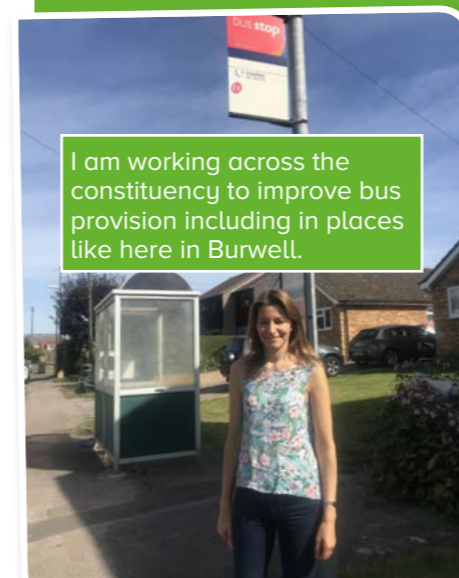

## Protecting Local Healthcare Services

I have supported our local health authorities bid for **more funding**. This autumn the Government announced that Addenbrooke's will share in a **£100 million fund**. I have supported the building of the new **children's hospital** on the Addenbrooke's site and saved our local minor injuries unit in Ely. I will continue to fight for improved healthcare services.

## Criminalising Inappropriate Behaviour

As a Justice Minister I took through Parliament the **up-skirting legislation** – criminalising the degrading treatment of taking a picture up someone's skirt. This now has a punishment of up to two years in prison.

I am working across the constituency to improve bus provision including in places like here in Burwell.

## Increasing Bus Provision Locally

I am working with councils and residents to input into the Combined Authority strategic bus review so that we can get more buses running through our villages. I worked with Bottisham residents and Conservative Councillors to improve the bus stop on the A1303 which now has a new shelter and hard standing.

Lucy and Fordham District Councillors meeting Kit Malthouse MP (centre right), the then Housing Minister.

## Campaigning For Greater Local Control Over Planning

We need to build more houses nationally but I know that people want to have more input into what development happens in their area and where. I recently met with the Housing Minister alongside councillors to discuss concerns about **speculative planning applications** and overdevelopment. I have consistently raised issues with the planning regime with Ministers to improve our area.

## Improving Our Rail

Working with other MPs, local councils and the Combined Authority we have secured significant investment in rail in our region – with a new station in Cambridge North already built, a new station in Soham where construction is due to commence in 2020, and I am working to improve train capacity through Ely and Newmarket stations.

## Tackling Climate Change

Reducing the effects of climate change is one of the great issues of our time. By committing to net-zero emissions by 2050, the UK Government remains a **global leader** on this issue. Our **renewable electricity capacity has trebled since 2010**, with a third of all electricity generation now being supplied by renewable sources. The UK is now **decarbonising faster than any other G20 country** and we have decreased our emissions by 29% in the last decade. But we still need to do more, and I am working both nationally and in our local area to protect our planet for the future.

## More Officers on the Beat

The Prime Minister has committed to getting **20,000 more police officers** on our streets with a **£2.5 billion** package for **more prison places**. As a Justice Minister, I have worked to make our justice system more effective with better use of our courts and

Lucy and Jason Ablewhite, the Police and Crime Commissioner for Cambridgeshire

new security measures to tackle drugs in our prisons. Working with Cambridgeshire Police I have helped in a programme to assist teens deal with youth violence, drugs and cyber security. **We need to keep our area safe.**

## Increasing Our Cycle Routes

I have been working with the Greater Cambridge Partnership to help deliver the Greenways projects which will bring more cycle paths to our area. These include routes in Fulbourn, Waterbeach, Horningsea and Linton. I am pressing for additional routes to be identified and working with the parish council to progress the planned Burwell to Exning cycle path.

## Improving Broadband And Mobile Connectivity

For 4 years I have worked with Government, BT, Connecting Cambridgeshire and others to ensure we have better connectivity and we now have **97% superfast broadband coverage** across Cambridgeshire. Many of the villages I represent are now benefiting from better coverage. I recently met with all major UK mobile providers – O2, Three, Vodafone – who are now considering ways to improve their local coverage. Vodafone and O2 have already made changes to Waterbeach coverage as a result.
